

Press Release

Kuraray-Japan appoint PSA-India as their exclusive Indian distributors

Kuraray Chemical Co. Ltd. – Japan (Kuraray) have appointed PSA Nitrogen Ltd. (PSA) as their exclusive Indian distributors for Kuraray CMS for Nitrogen Production. This exclusive partnership enables Kuraray and PSA to jointly and effectively offer superior grade CMS to the Indian market.

“India is a key strategic market for us, and PSA Nitrogen Ltd being the largest air and gas treatments systems company in this space in India along with its brand name, quality and reach in the market enables us to offer our products for standard as well as high purity requirements in the region”, indicates Mr. Hideki Yashiro, Director of Kuraray Chemical. Mr. Prabhas Misra, Managing Director of PSA Nitrogen Ltd. adds: “We are very pleased to associate with Kuraray in this venture and look forward to offering quality products and services as always. Our clients and all users of Kuraray CMS can expect to receive prompt technical support and service from us at all times”.

Kuraray Chemical Co. Ltd – Japan have been manufacturing superior grade coconut based CMS (Carbon Molecular Sieves) for the last more than 25 years for use in nitrogen production through pressure swing adsorption principle.

PSA Nitrogen Ltd. – India have been manufacturing PSA principle based Nitrogen Gas Generation Plants and other air and gas treatment systems for the last more than 25 years – having supplied more than 1500 No. equipments using CarboTech – Germany make coal based CMS. However, in view of recent developments of CarboTech – Germany having closed and totally discontinued their manufacturing activities, PSA Nitrogen Ltd. have started using Kuraray – Japan make CMS with excellent results.

PSA maintains ready stock availability of Kuraray – Japan CMS at all times.
